## ANAT Open Ended Questions

### What did you like most about this course and instructor?

#### Comments

Theo is the absolute man. Super funny, great lecturer, provides useful tidbits and advice every single lab. I shudder to think about taking this lab without Theo as the instructor. Dude is just A+, loved having him as an instructor.

The course was fun to learn all the parts of the body. Theo is a great instructor and understands good ways to help students learn. He is enthusiastic and fun to be around. He will make an excellent professor one day.

He wanted us all to do well.

I felt like Theo made the material as clear as possible. He made analogies to help us remember material.

He is clearly very knowledgeable and he always brings a sense of humor to class so its never boring

Theo was a teacher that you definitely have to adjust to, but when you do he's awesome and he is always up for helping you learn more and I loved that.

Theo always motivated me to do better if I got bummed about an exam grade

Theo did a really good job of integrating lab and lecture, and relating to the students in his classroom.

very passionate, would relate lab and lecture, would give good tips and tricks to help studying

I liked that this course was challenging and that I understand so much about how my body works. I liked Theo because he always pushed me to do my best work in class and was always there to answer my stupid questions.

I liked how instead of giving a direct answer to the questions I asked he gave the answer with a very detailed description.

I like how he kept it interesting and always provided humor during stressful times. He was really good at making us feel better about ourselves with the material

Cares about his students

## What did you like least about this course and instructor?

### Comments

There's just so much material that's purely memorization based and as someone who gets major test anxiety, the test format cause me an untold amount of stress and this course definitely gave me low level anxiety the whole semester. I absolutely hated this course and if weren't for how good Theo and Xingyue were, I surely would have missed more labs and done worse.

Nothin bad to say about Theo, he is the man.

The course at times could be a little overwhelming, especially when we are expected to learn most of the concepts ourselves.

He has a quick temper. Also pressures you to answer questions when you ask him a question rather than just answering it.

nothing

He can sometimes come off a bit too sarcastic but he always means well by his actions.

Loved him. Amazing. Anyone lies if they say anything different

The course was just naturally difficult for me.

N/A

I do not have a complaint.

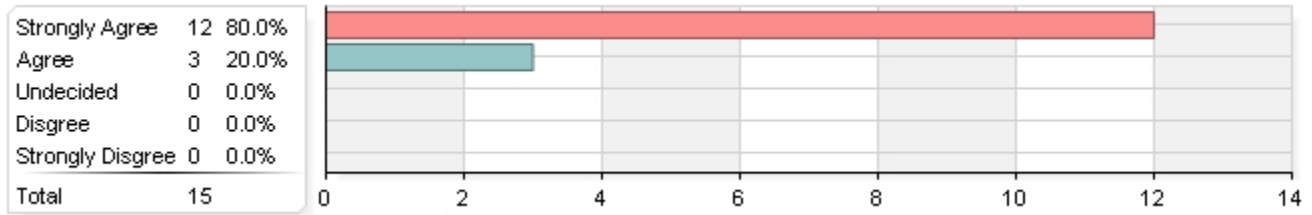

It took me awhile to get used to his teaching technique– he asked questions and asked what I thought the answer was instead of directly giving me the information. This was frustrating at first but it really helped me learn. I would recommend him to any other student.

None

nothing
